

“At Maple View,
We Get It”

Maple View

Memory Care. We Get It.

We understand the progress of Alzheimer’s disease, dementia and related memory impairments. We also understand that each person experiences its progression differently, because we get it.

Our compassionate caregivers at Maple View honor and validate our resident’s feelings and are accepting of his/her interpretation of their surroundings. This supportive environment provides our residents with the care, stimulation and socialization they need.

Home-Like Setting Aids Independence

If your loved one suffers from wandering, forgetfulness, confusion and related behaviors, you may think that a nursing home is the only option. However, the smaller, quiet environment at Maple View may provide a more appropriate level of care and promote independent living.

You will also rest comfortably knowing that your loved one is able to explore freely in our fully secured building.

Health Needs Require Teamwork

Maple View has teamed up with local nurse practitioners, physical and occupational therapists, and other health care professionals to make “house calls” to our residents. These outside caregivers work hand-in-hand with our licensed nurses to meet our residents’ current and long-term health needs.

Activities Designed to Match Abilities

Our innovative activity program, based on the method and philosophy of famed educator, Maria Montessori, engages residents in activities that are stimulating and challenging, yet failure-free.

Most importantly, Maple View allows our residents to live life to the fullest. At Maple View, We Get It.

{ Thanks to Maple View, Mom is comfortable,
well taken care of, and most of all, safe.
Melissa Hovey and Kathy Wolff }

My wife is getting very good care and I would recommend Maple View to anyone.

Richard Nagel

- Walk-in spa tub
- On-site beauty/barber shop
- Long Term Care Insurance and Medicaid Reimbursement accepted

Care Programs and Rates

A variety of programs are available at Maple View. We can care for your loved one for an hour, a day, a week, or on a full time basis.

Caring for a loved one with Alzheimer's disease is truly a labor of love. Give yourself some relief time from the daily routine of caregiving with our **Adult Day Services**. By using this program, you'll have time to finish other tasks or relax. Rest assured that your loved one will receive the same quality services as our full-time residents.

Our **Respite Care** provides services overnight or for an extended period of time, allowing caregivers to take time off to recover from surgery or even take a short trip with friends.

Full-time Residency at Maple View delivers the additional care, stimulation and socialization your loved one needs.

This is a warm and quiet environment, and the food is good, too.
