

# Maple View Memory Care

**We Get It**

## **FULL TIME RESIDENCY**

Maple View Memory Care Community specializes in 24-hour care for those with memory impairment. Our full time residency program offers a secure, small, home-like environment that is unique to meet the needs of those we serve.

Freedom of movement, socialization and specialized programming all contribute to an environment that helps those who reside at Maple View to achieve their maximum social, mental, physical and spiritual potential.

At Maple View, we understand the needs of those with memory impairment. We Get It!

## **ADULT DAY SERVICES**

Caring for a loved one with memory loss can truly be a challenge. That is why Maple View offers the Adult Day Services program. Our ADS program is flexible to meet your needs and the needs of the individual you are caring for. Bringing your loved one to our program will provide you with the relief time that you need for yourself.

People with memory loss, whether living at home or with family, will benefit from the additional care, stimulation and socialization provided through our ADS program.

At Maple View, we also understand the unique needs of a caregiver. We Get It!

## **RESPITE CARE**

Maple View's Respite Care program is available to caregivers in need of a comfortable, secure place for their loved one to stay overnight on a temporary basis. This program is available to provide caregivers with the "break" they need for a vacation, family emergency or just for some time off.

At Maple View, We Get It!
